

# Rockets Online Campus

"Where Every Student Can  
Learn, Grow, and Succeed"

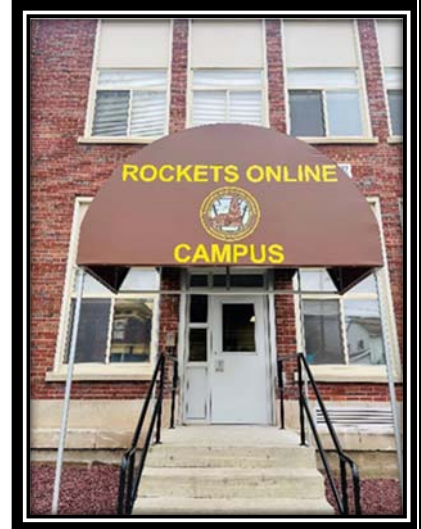

2023-2024

Program Overview

The Rockets Online Campus Launch Pad is located along the Drake Street side of the Titusville High School in the Titusville Area School District. The mailing address is 316 North Drake Street, Titusville, PA 16354.

**Hours:** 8:00 AM to 7:00 PM

The Rockets Online Campus (ROC) is an exciting cyber school opportunity for students in grades K4 through 12<sup>th</sup> grade. The ROC's main goal is to provide students with choices for their educational path. Our dedicated and highly qualified faculty, staff, and administration will work endlessly to support each and every student and their family. For our ROC students, we have also created a physical space called the "Launch Pad". Dedicated faculty and staff are available to focus on and support all online ROC students. This is in addition to the support that students receive from our ROC teachers. All ROC students will be provided with high quality and locally created curriculum. This curriculum has been implemented in all subject areas to provide a variety of superior offerings to our students.

With the unique structure of the Rockets Online Campus, we can partner with families and students to achieve success. The program is built to allow for individual differences and circumstances. Communication between students, families, teachers, and the Rockets Online Campus faculty and staff is the key to student progress, achievement, and overall student success.

The Rockets Online Campus takes pride in supporting and serving each individual student and their family as their children learn, grow, and succeed.

Sincerely,

*Michael T. McGaughey, Sr.*

Assistant Superintendent and ROC Administrator

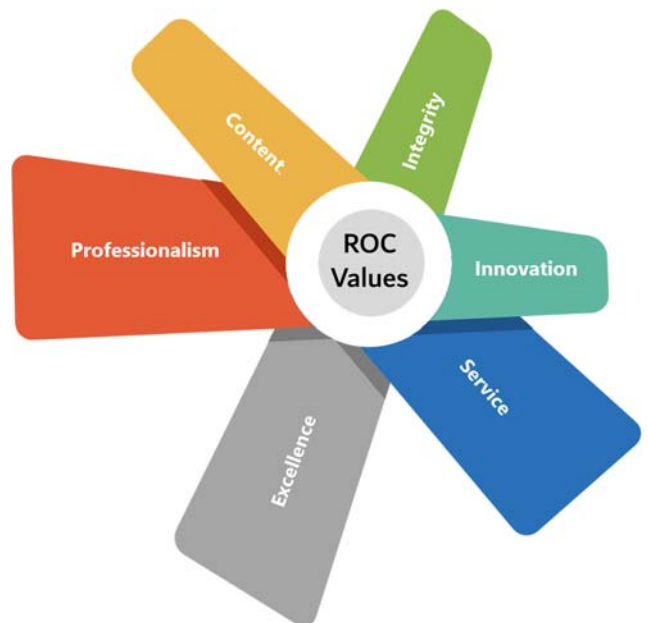

# Rockets Online Campus Mission, Vision, and Values

**Mission Statement** – The Rockets Online Campus will empower all participating students and their families to become active participants in their own learning and equip them with skills for the future.

**Vision Statement**- The Rockets Online Campus will inspire our students to be leaders who learn, grow, and succeed.

## **Rockets Online Campus Values**

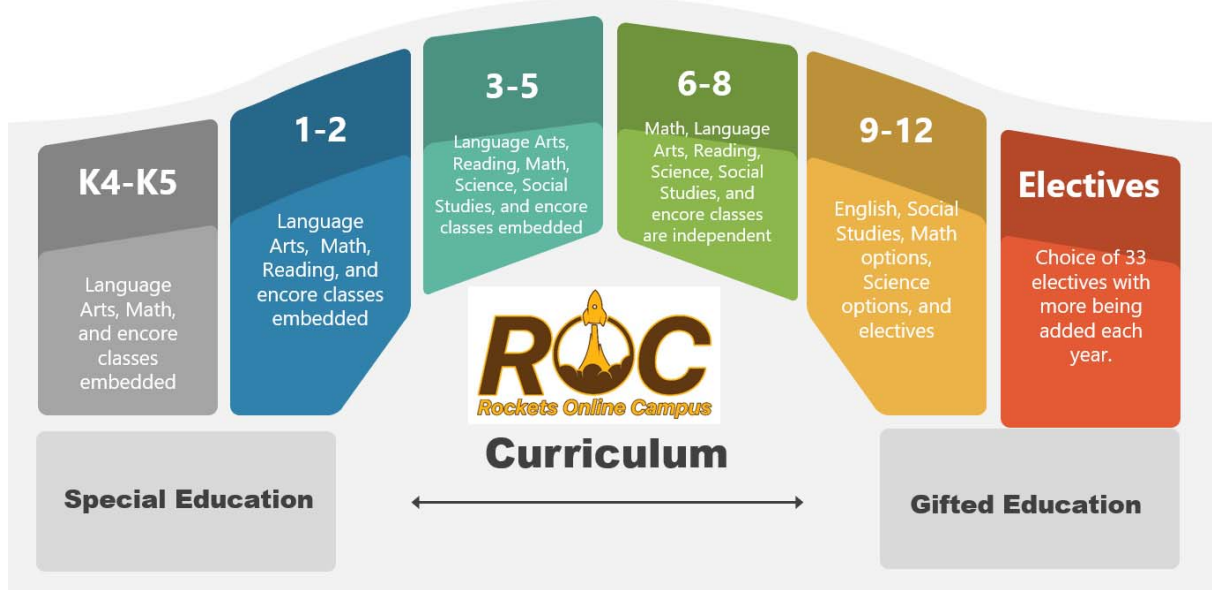

- Content- Provide engaging, varied, and relevant content to our students delivered by innovative teachers in a caring culture.
- Integrity- The Rockets Online Campus will act with transparency, honesty, and accountability as we strive for exemplary work and student achievement.
- Innovation- The Rockets Online Campus will encourage new ideas and practices that will foster student growth and achievement.
- Service- The Rockets Online Campus will strive to ensure that all students and their families are provided with positive experiences with our programming being responsive to the student's and their family's needs.
- Excellence- The Rockets Online Campus will challenge our students to advance to their highest level of achievement.
- Professionalism- The Rockets Online Campus will place value on all stakeholders. All students and families will be treated with respect, courtesy, and professionalism.

# Instructional Delivery

The Rockets Online Campus curriculum is locally created and maintained.

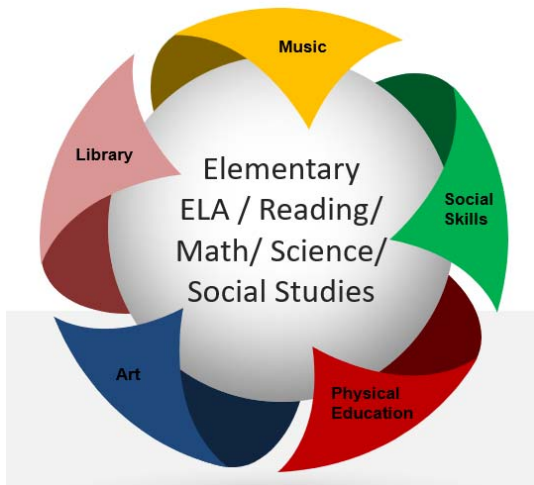

## Elementary - K4 to Fifth Grade

Elementary school establishes the educational foundation for young learners. At this stage of their educational journey, students begin to think critically, problem-solve, and manage their learning time; all skills that will help foster future academic success.

Families with elementary-level students should expect to partner with the Rockets Online Campus (ROC) faculty and staff to assist their child. The Rockets Online Campus faculty will work directly with each student, as well as assist the families, to provide strategies to coach the elementary students. The combination of synchronous and asynchronous learning will allow each elementary student to make educational gains. The daily morning meetings provide the students with live lesson introductions, redirection, and enrichment opportunities. Additionally, ROC tutoring and virtual remediation sessions can be scheduled and provide the necessary additional supports that allow all students to be academically successful.

Students are expected to spend approximately 5 hours working on their assignments each school day.

## Middle School- Sixth to Eighth Grade

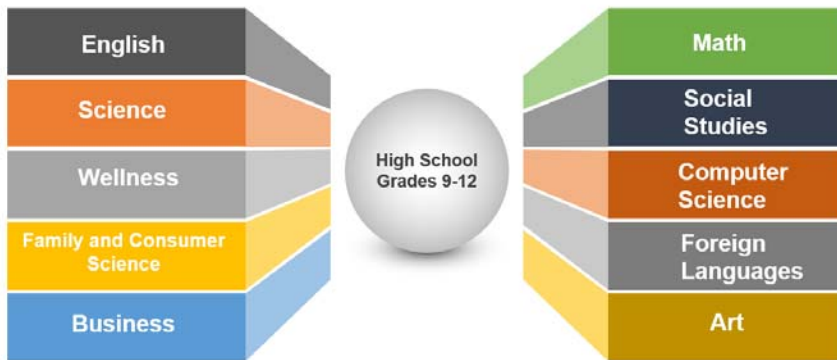

ROC middle school curriculum continues to build on the existing educational foundations of students. At this stage of each student's educational journey, students continue to hone their critical-thinking and problem-solving skills. Middle school students engage and participate in classes under the supervision of their teachers. Lessons use discussions, videos, webcams, and other forms of communication to engage each student in learning. Students become more independent and begin to actively and independently manage their learning time, taking ownership of their education. Instruction is comprised of instructor-created classes and independent asynchronous work guided by the ROC faculty. In addition, a synchronous secondary opportunity is provided to all middle level students in the "Help Line". This support is managed by all of

our middle level core teachers and students are encouraged to do their work during this window of time. Additional independent supports are also available and are based on a student's individual needs.

Parents should expect their middle school student to spend 5-5 ½ hours per day doing their assignments.

## High School - Ninth through Twelfth Grades

with an asynchronous learning approach for their course work. In addition, synchronous learning opportunities are also available to all high school students through the "Help Line". This support is available for four hours per school day. The core teachers (English, Math, Science, and Social Studies) are available during this time. Individual and/or small group work sessions can occur. Questions can be answered, reteaching, and remediation can be provided with a live teacher to enhance all asynchronous learning opportunities.

Rockets Online Campus high school students prepare for their future journey to work and post-secondary education. Students learn techniques to manage their time, solve problems, take personal responsibility, properly use information and communication technology, and gain global awareness. All high school students need to take at least 6 courses to maintain their path to graduation. Students should plan to spend at least 5 ½ hours of time with their studies. Students are provided

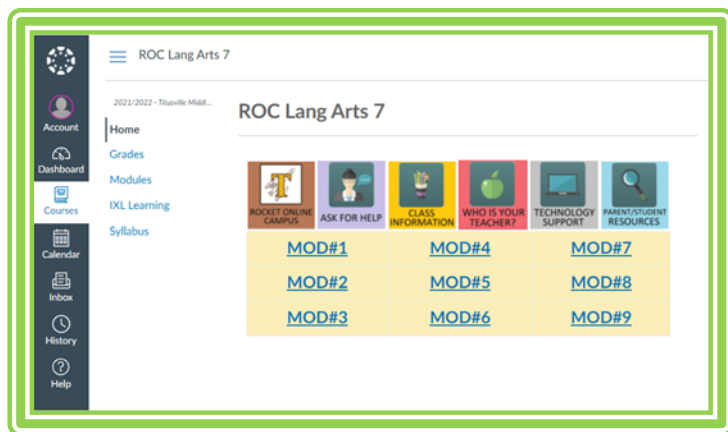

Website: [www.rocketsonlinecampus.org](http://www.rocketsonlinecampus.org)

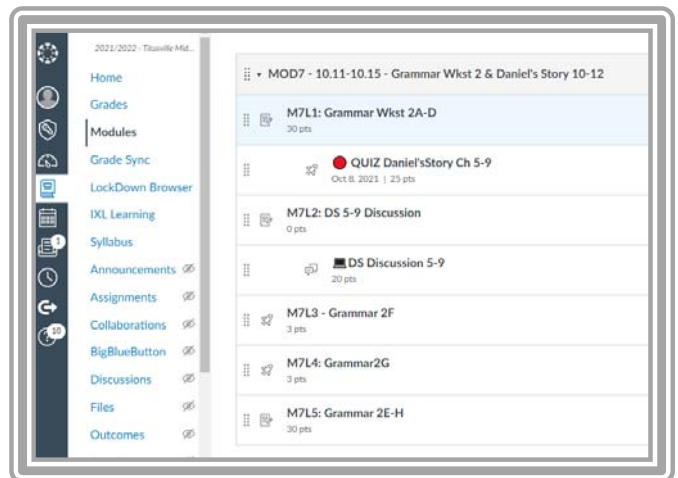

All high school students are encouraged to do their work during this window of time. Additional support and individual tutoring are available and are based on a student's individual needs. High school students have the opportunity to select from up to thirty-three different electives with the Rockets Online Campus. Each year, ROC develops additional elective courses.

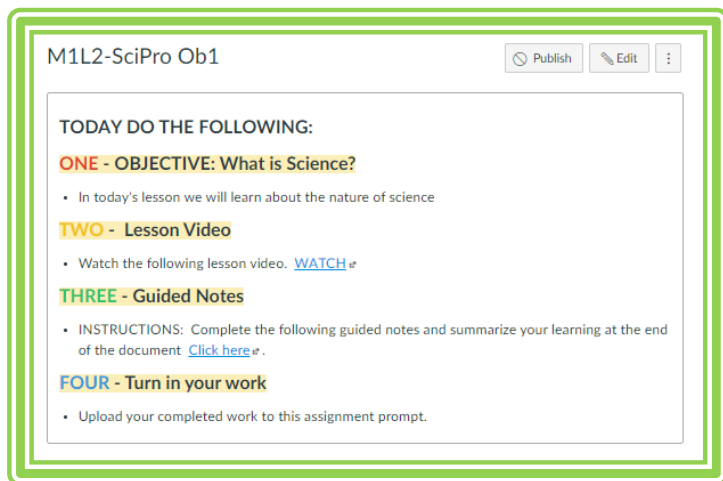

## Each course has a module arrangement

Each module is broken down into daily lessons.

Each lesson is broken down further into a simple step-by-step instruction approach for the students.

## Rockets Online Campus Supports!

Getting help with the faculty and staff at the Rockets Online Campus is easy! We offer Morning Meetings, a Check-in and Chat option for elementary students, and Online Help Line approach for the secondary students. All of these meetings are on demand, but are also regularly scheduled daily to improve student achievement.

Type of Support	Details
Grades K4-5	Morning Meetings and Check-in and Chat -These meetings occur daily and are virtual meetings with synchronous learning.
Grade 6 Help Line Grades 7-12 Help Line	Online Help is available daily. 6 <sup>th</sup> grade is separated from grades 7 through 12 <sup>th</sup> . All secondary teachers are available to support all subjects and courses. Students can also be placed in a break out room for one-on-one help. Help is just a click away with the Online Help Line!

Tutoring is available between 8:00 AM and 7:00 PM. We strongly encourage all students to use this supportive service.

All of these supports ensure that the students achieve. Our team will work with any student to help them understand what they are doing in their classes, establish a connection with their teachers, and to ensure that they are working and going in the right direction. We encourage ALL students to use this feature of the ROC to help them achieve!!!! We are ready to help each and every student realize their academic potential. Help is just a call or email away!!!

The Rockets Online Campus offers students choices to guide their educational experience. As stated many times throughout this catalog, our Rockets Online Campus faculty, staff, and administration will work endlessly to support your student and your family as your child goes through their educational journey. Our flexibility, passion for support, and solid curriculum will provide all Rockets Online Campus students with a superior educational opportunity. Please reach out to us and let us help you and your child choose their path and make their online education a positive and rewarding experience.

Thank you,  
The Rockets Online Campus Team
